

YENMAK®

ENGINE PARTS

THE **POWER**
IN YOUR
ENGINE

Adventure: It started with a small workshop bought at the "Eski Sanayi" in Konya.

1965

We realized our first exhibition participation.

1980

We realized our first foreign export.

1983

Our first domestic and foreign trade office was founded in Konya in Oto Parçacilar Sitesi.

1991

We started the air-cooled cylinder liner production.

1996

We moved our domestic and foreign trade office to İstanbul which is the center of trade in our country.

1998

We managed to make exports to exactly 36 countries.

2002

We increased our production rate with the expansion of machinery park in our piston factory.

2006

We combined our logistics services with our head office building.

2008

We increased our production rate with the expansion of machinery park in our cylinder liner factory.

2010

We also started to use robot technology in our productions. We activated the laser technology in our cylinder liner factory.

2012

Our products continue to provide power to the engine in the world.

2018

We also started to present the connecting rods to the market.

2022

1979

Our new cylinder liner factory started its production in the 1st Organized Industrial Zone.

1982

We have invested cast iron foundry and metallurgy quality control laboratory in our cylinder liner production facility.

1986

We increased our production volume with the new machinery facility.

1995

Our Piston & Piston Pin factory started its activities in the 2nd Industry zone.

1997

We also started to present the products such as Ring, Engine Bearings, Bushings, Valves, and Gaskets to the market.

1999

We have been certified ISO9001.

2003

We designed our R&D department in our Piston factory and we activated the foundry plant for production.

2007

We moved to our new head office building.

2009

We certified our quality with the international ISO/TS16949 certificate.

2011

The number of the countries to which we are exporting has been increasing exactly 73 countries as of the year.

2013

Steel piston and steel liner have included in our product portfolio.

2020

We also started to present the products Filter to the market.

2023

We increased our production capacity with the start of our new cylinder liner foundry.

Yenmak, as a small workshop was founded in Konya by Kahvecioğlu family in 1965. Over the years, Yenmak constantly renewing and improving itself regardless of engine parts supplier on domestic and abroad was one of the largest suppliers worldwide.

Yenmak today KIT, PISTONS, PISTON PIN, PISTON and CYLINDER ENGINE LINER production and with supply SEAL, VALVE, ENGINE BEARING, CONNECTING ROD; these products are exported to more than 100 different countries on 5 continents.

We see our valuable customers as a long-term business partner. And in this consciousness, we serve you all the engine parts in a package with ultimate confidence and the best quality reasonable price.

In addition, knowing that most important of all components of the human factor YENMAK gives considerable importance and value of customer relationships.

YENMAK; INMETRO, ISO 9001, IATF 16949 ve ISO 14001 certified.

Today, 2 factories and 1 Head Office & Logistics building with a total of 50,000 square meters and is based in Konya 1. 2. 3. Organize industrial areas.

Sales and marketing activities in Istanbul in YENMAK export office is performed.

YENMAK develops itself and its suppliers with investments in personnel and technology and has adopted presenting the engine repair parts as **Engine Cylinder Liner, Piston & Piston Pin, Ring, and Engine Bearing & Kit** in high quality and with the appropriate price to the market as its **QUALITY POLICY**.

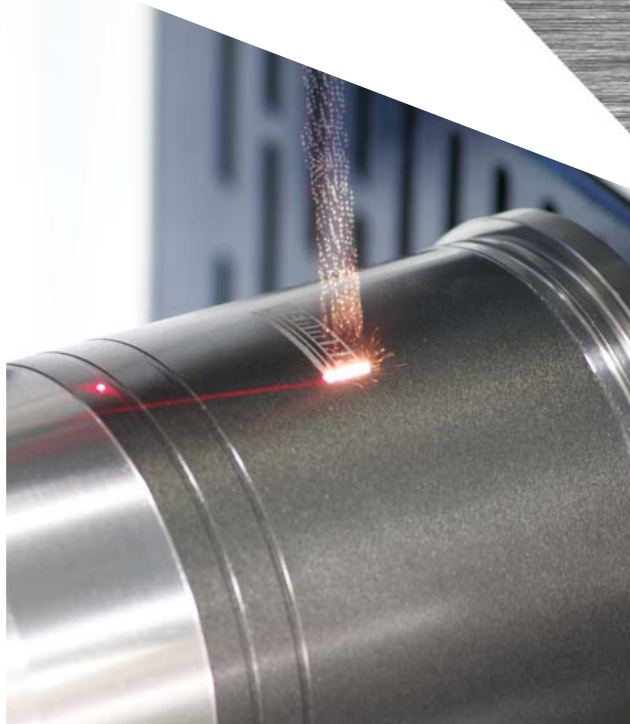

Excellent labour and technology product; Engine liner

Due to our experiences over long years in centrifugal casting production, for air, water cooled and special engine types for all current engine types and brands;

- ▶ **Finished (Honed),**
- ▶ **Semi-finished (Unhoned)** cylinder liner production is realized.

It has annual production capacity of 2.000.000 units of engine cylinder liner. From the cast iron within a diameter range of 50 and 200 mm, the finished or semi-finished, coated or uncoated engine cylinder liner is produced. Our cylinder liner factory makes 3-shift production with its 200 employees.

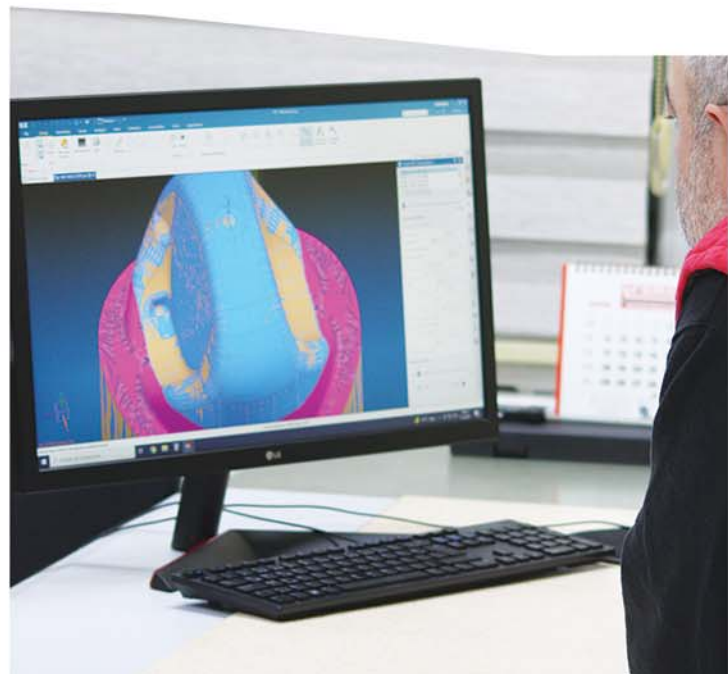

The highest level of technological production; Piston & Piston Pin

YENMAK Piston factory has realized the piston production actively in 1995 with its current annual 1.500.000 units of piston production capacity. As the piston types, in the diameter measures in the range of 60 and 200 mm; it produces

- ▶ Ring carrier pistons,
- ▶ Oil-cooling gallery piston,
- ▶ Hardanodized coated pistons,
- ▶ Pin hole bushing pistons,
- ▶ Mono-steel and articulated-steel pistons.

YENMAK pistons are packed into the YENMAK boxes with great diligence and care together with the piston bushing, piston pin and snap ring. YENMAK Piston factory makes 3-shift production with its 200 employees.

Connecting piston and cylinder liner the most sensitive product; Piston Ring

YENMAK has a piston ring sales volume over 2.000.000 pieces domestically and worldwide; these are classified as following

- ▲ Steel,
- ▲ Cast,
- ▲ Gray cast iron,
- ▲ Special Alloy Material diversity and covered with
 - ▲ Phosphate,
 - ▲ Chrome,
 - ▲ Chrome Ceramic,
 - ▲ Nitride,
 - ▲ Molybdenum coating,
 - ▲ Diamond,
 - ▲ PVD.

It also makes the sales of special alloy, special coated and specially designed rings for industrial, work machines and internal combustion engines, whose natural gas conversion is realized which are available in the market.

ENGINE BEARING

YENMAK realizes the sales of the engine bearings installed in many gasoline and diesel vehicles / engines all over the world. Also, with its experience and engineering accumulation, it realizes the special alloy engine bearing sales for new engines presented to the market and the thick or thin-walled bearing sales for every gasoline or diesel engine types.

Its product range is scope is as following;

- ▲ Main bearing,
- ▲ Sleeve bearing,
- ▲ Moon bearing,
- ▲ Arm bushing,
- ▲ Eccentric bushings.

BUSHING

YENMAK;

Makes bushing sales for all kinds of vehicles, machines, water pumps, oil pumps etc. having

- ▲ Steel cased bronze,
- ▲ Steel cased aluminum-tin alloys,
- ▲ White metal material.

ENGINE VALVE

YENMAK Automotive realizes the sales of the special alloy and plated valve guides and engine valves in many fields including;

- ▲ Passenger Cars,
- ▲ Light commercial vehicles,
- ▲ Tractor,
- ▲ Heavy vehicles,
- ▲ Marine vessel engines.

FILTER

It has 5 main titles as

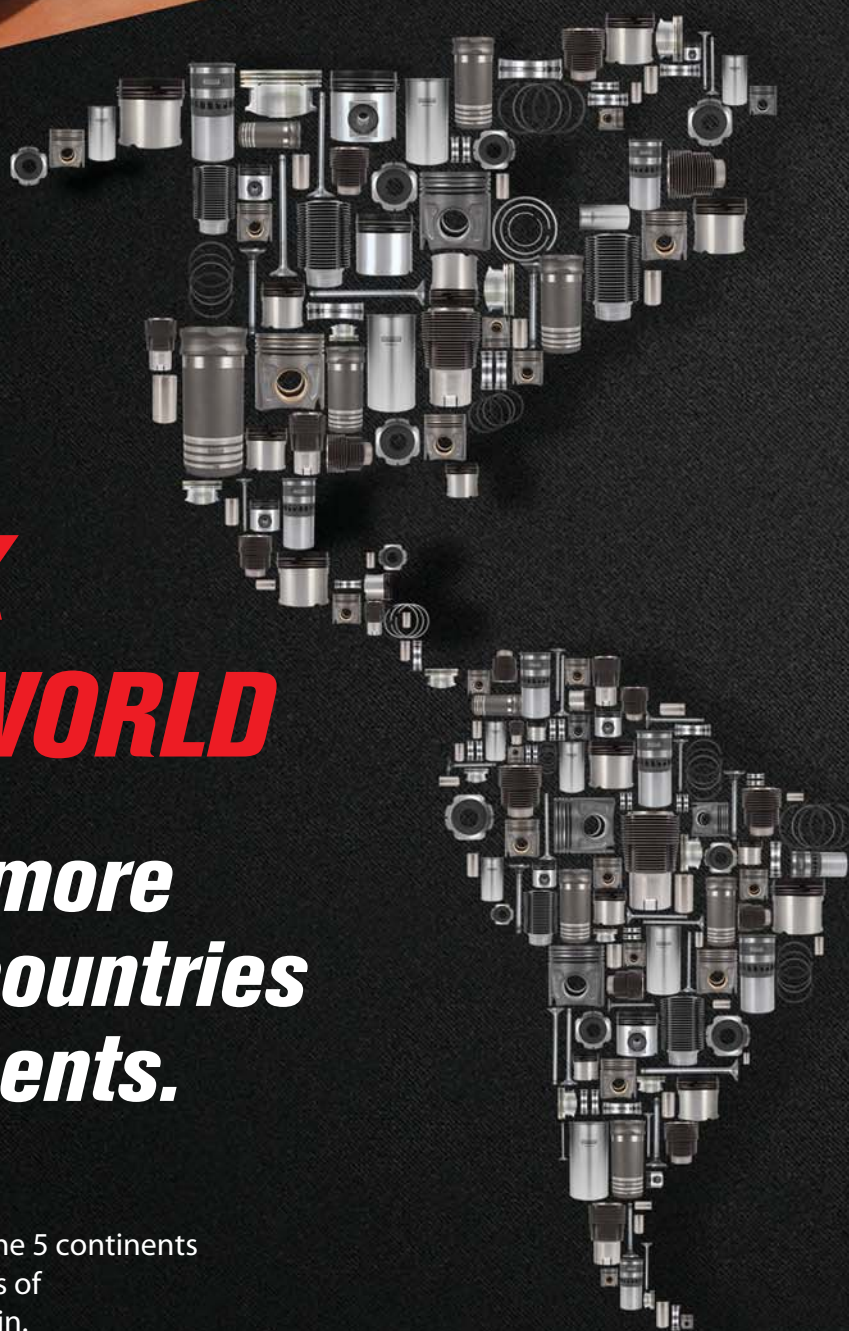

- ▲ Oil Filters,
- ▲ Fuel Filters,
- ▲ Air Filters,
- ▲ Cabin Filters and
- ▲ Dryer Filters.

Thanks to the media variability we use in filtering systems in the light of the latest technological developments;

- High reliability, efficiency and performance,
- Increased service time due to the increase in capacity,
- Better capacity in holding wet, silk, tulle or cellulose,
- Increasing performance and providing a high level of motor protection,
- Highest performance rate in industry,
- Advanced 'cleanable' features and qualities (reusability),
- More Mileage warranty and extended service life,
- High permeability or flow can be maintained throughout the life cycle.

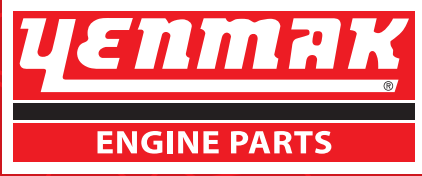

YENMAK IN THE WORLD

***We are in more
than 100 countries
in 5 continents.***

Since 1965, we have been in the 5 continents of the world with our products of liner, piston, piston ring and pin.
